PROFESSIONAL SUMMARY

First-year BSc Computer Science (Artificial Intelligence) student at The British College, affiliated with the University of the West of England (UWE Bristol). Experienced in Python, JavaScript, and web development. Demonstrated team leadership by directing a group coursework project covering website development and game creation. Actively building AI knowledge and practical engineering experience.

EDUCATION

BSc (Hons) Artificial Intelligence Oct 2025 – Oct 2029
The British College (UWE Bristol) — Kathmandu, Nepal

- Studying core AI concepts: machine learning, data structures, algorithms
- Building practical programming skills through coursework and projects

Higher Secondary Education 2022 – 2024
Kathmandu Model Secondary School — Kathmandu, Nepal

Secondary Education (SEE) Apr 2019 – Apr 2022
Shree Sankat Mochan Devsharan Ramrati Secondary School — Janakpur

PROJECTS & EXPERIENCE

Group Web Development Project — Team Lead 2025
The British College | Academic Coursework

- Led a team in planning, designing, and delivering a full web development project.
- Managed task allocation, deadlines, and code integration across team members.
- Built interactive browser-based games and UI elements using JavaScript and HTML/CSS.
- Presented project documentation and live demo to academic evaluators.

GOALS & INTERESTS

- Deepening expertise in Artificial Intelligence and Machine Learning.
- Building real-world software projects to complement academic learning.
- Exploring open-source contributions via GitHub.
